WORKSTATIONS THAT INSPIRE PRODUCTIVITY.

We help you find the right ergonomic workstations for your company. That means you'll receive innovative workstation solutions that fit your exact specifications for performance, productivity and aesthetics. And you'll get the easiest-to-assemble, longest-lasting workstations on the market.

Then, you can get right to business.

→ GENERAL ASSEMBLY & MANUFACTURING

To create an efficient assembly operation, your business goals, staff and end product must all work in concert. You need your workstations to deliver organization and successful product flow. Production Basics offers height adjustability and a variety of micro-adjustable accessories so you can configure a workstation system to fit your assembly and manufacturing needs.

- C-Leg Series with Add-on Station
- Quad Station
- RTW Table with Add-on Corner

- Peg Board
- Tool Trolley System
- Writing Shelf, Drawers and Shelving
- Air and Power Distribution
- Computer Accessories

→ ELECTRONICS MANUFACTURING

Your facility demands flexibility and static protection. Whether your business is contract manufacturing, medical devices, wiring, repair or testing, you need ESD workstations that protect and perform. Our reach reducing accessories and height adjustability enhances operator productivity and comfort.

- Stand-Alone C-Leg Station, ESD Worksurface
- RTW Table with Riser Shelf, ESD Worksurface
- 20-tray PCB Transporter

- Slide Line
- Bin Rail and 3-inch Bin Rail Extension
- ESD Quad Jack
- Overhead Light
- Shelving

→ MATERIAL HANDLING & PACKAGING

When your products are moving, so is your business. Production Basics provides affordable material handling workstations and accessories that help you get your product packed up and out the door. Use our products in your fulfillment center, kitting area, shipping and receiving department, or for general packaging and warehouse tasks. Integrate our workstations with racking, shelving and conveyor systems for a complete solution.

- RTW Table
- Hand-Crank Adjustable Table
- Packaging Depot
- Flow Rack
- Utility Cart

- Tilting Universal Shelf
- Shelf Dividers
- Maple Worksurface
- Pedestal and Drawer Units
- Binder Holder
- Paper Roll Holder

→ LABORATORY

Production Basics can provide the furniture to match your precise, clean, and professional laboratory. Accessories are installed in the vertical space above the worksurface to keep the work area uncluttered. Multiple storage options organize equipment and supplies. Mobile stations and carts improve lab layout and handling. Our products create an environment that helps you focus on productive research and testing.

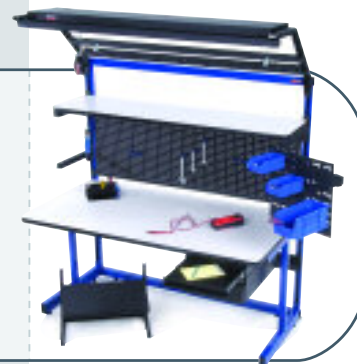

- RTW Table with Uprights
- Stand-Alone C-Leg Station
- Electric Station

- Wire Shelving
- Pedestal Drawers
- Overhead Lighting
- Modesty Panel
- Footrests

- Standard 750-1000 lb workstation weight capacity supports large assemblies and heavy-duty manufacturing.
- Durable epoxy powder coat finish stands up to heavy use in the most demanding industrial environments.
- Linear, progressive, and box build set-ups are easy to achieve with add-on components.
- Modular frames and station components provide several configuration options including U-shaped or L-shaped set-ups for cell manufacturing.
- Double-sided workstations and carts provide flexible space for assembling, and manufacturing a high mix of products.

- ESD Worksurface includes integrated ground bolt and static dissipative laminate to ensure rapid charge drainage.
- Frame systems above the worksurface help you store and organize tools, components, supplies and equipment.
- Standard height adjustability from 30"-36" for operator comfort.
- Overhead Lighting enhances ambient light to reduce eyestrain for precision work.
- All workstations are caster-compatible for quick reconfigurations, accommodating the fluctuations of your business.

- 24", 30" and 36" deep worksurfaces help you create an ergonomic work area that fits your task.
- Durable construction. Workstations start with an 11-14 gauge steel frame.
- Standard 500-1000 lb workstation weight capacity supports high volume material handling.
- Worksurface options include UHMW, stainless steel, shop top and maple block.
- Move goods safely and efficiently with standard and custom designed carts.
- Production Basics has extensive experience integrating our ergonomic workstations with conveyor, fixed or pneumatic ball transfer and skate wheel units.

- Standard stations are cleanroom class 10,000 and can be increased using stainless steel or epoxy resin worksurfaces.
- Electric Station provides 15" of height adjustability for sitting or standing lab tasks and to accommodate stools.
- Choose from several enclosure options that provide privacy and noise control.
- Open, contemporary design allows you to take full advantage of your floor plan.
- All workstations are caster-compatible for quick reconfigurations of your lab.
- Production Basics provides design, layout, and installation assistance.

Custom Options

Production Basics has a variety of standard workstation configurations and accessories that will help you enhance productivity in your facility. But sometimes, a custom unit will push your business to the next level of efficiency. When your needs require a little more attention, our Custom Options department is ready to help. Our engineers will create high quality solutions with special materials, sizes, finishes, and configurations to fit your requirements. Call a workstation specialist to discuss your needs so we can start engineering a product that works for you.

Delivering Productivity

It's time to deliver some inspiration to you. Workstations are not just tables, they are tools for productivity. Call or email us to request a quote or more information about the tools that are right for you. For additional product details, ask for our comprehensive Product Specifier.
