Maple Worksurface

RTW Table shown with maple worksurface and optional Under-Surface Shelf, Uprights, Power Rail, Peg Board, Parts Bin Panel, Universal Shelf, Overhead Arms, Tool Trolley and Tool Balancer.

Maple Worksurface Specifications and Options

- **Weight Capacity:** 1000 lbs.
- **Edge Styles:** Straight (standard), optional Radius or Bullnose
- **Thickness:** approximately 1.75 inches

Choose a rich-looking and durable maple worksurface for any Production Basics workstation. Maple worksurfaces are extremely robust, performing well under heavy loads and repeated impact. Construction of maple worksurfaces starts with electronic bonding for maximum durability. They are then planed, sanded and finished with a non-toxic wear resistant finish that repels alcohol, bleach and paint thinner.

Application suggestions for maple worksurfaces:

- Packaging and shipping departments
- Assembly and handling of metal product or product with sharp edges
- High weight capacity requirements
- Frequent repositioning and movement of product
